THE COMPLEXITIES
INVOLVED IN
DESIGNING AND
INSTALLING A DUST
COLLECTION
SYSTEM.**

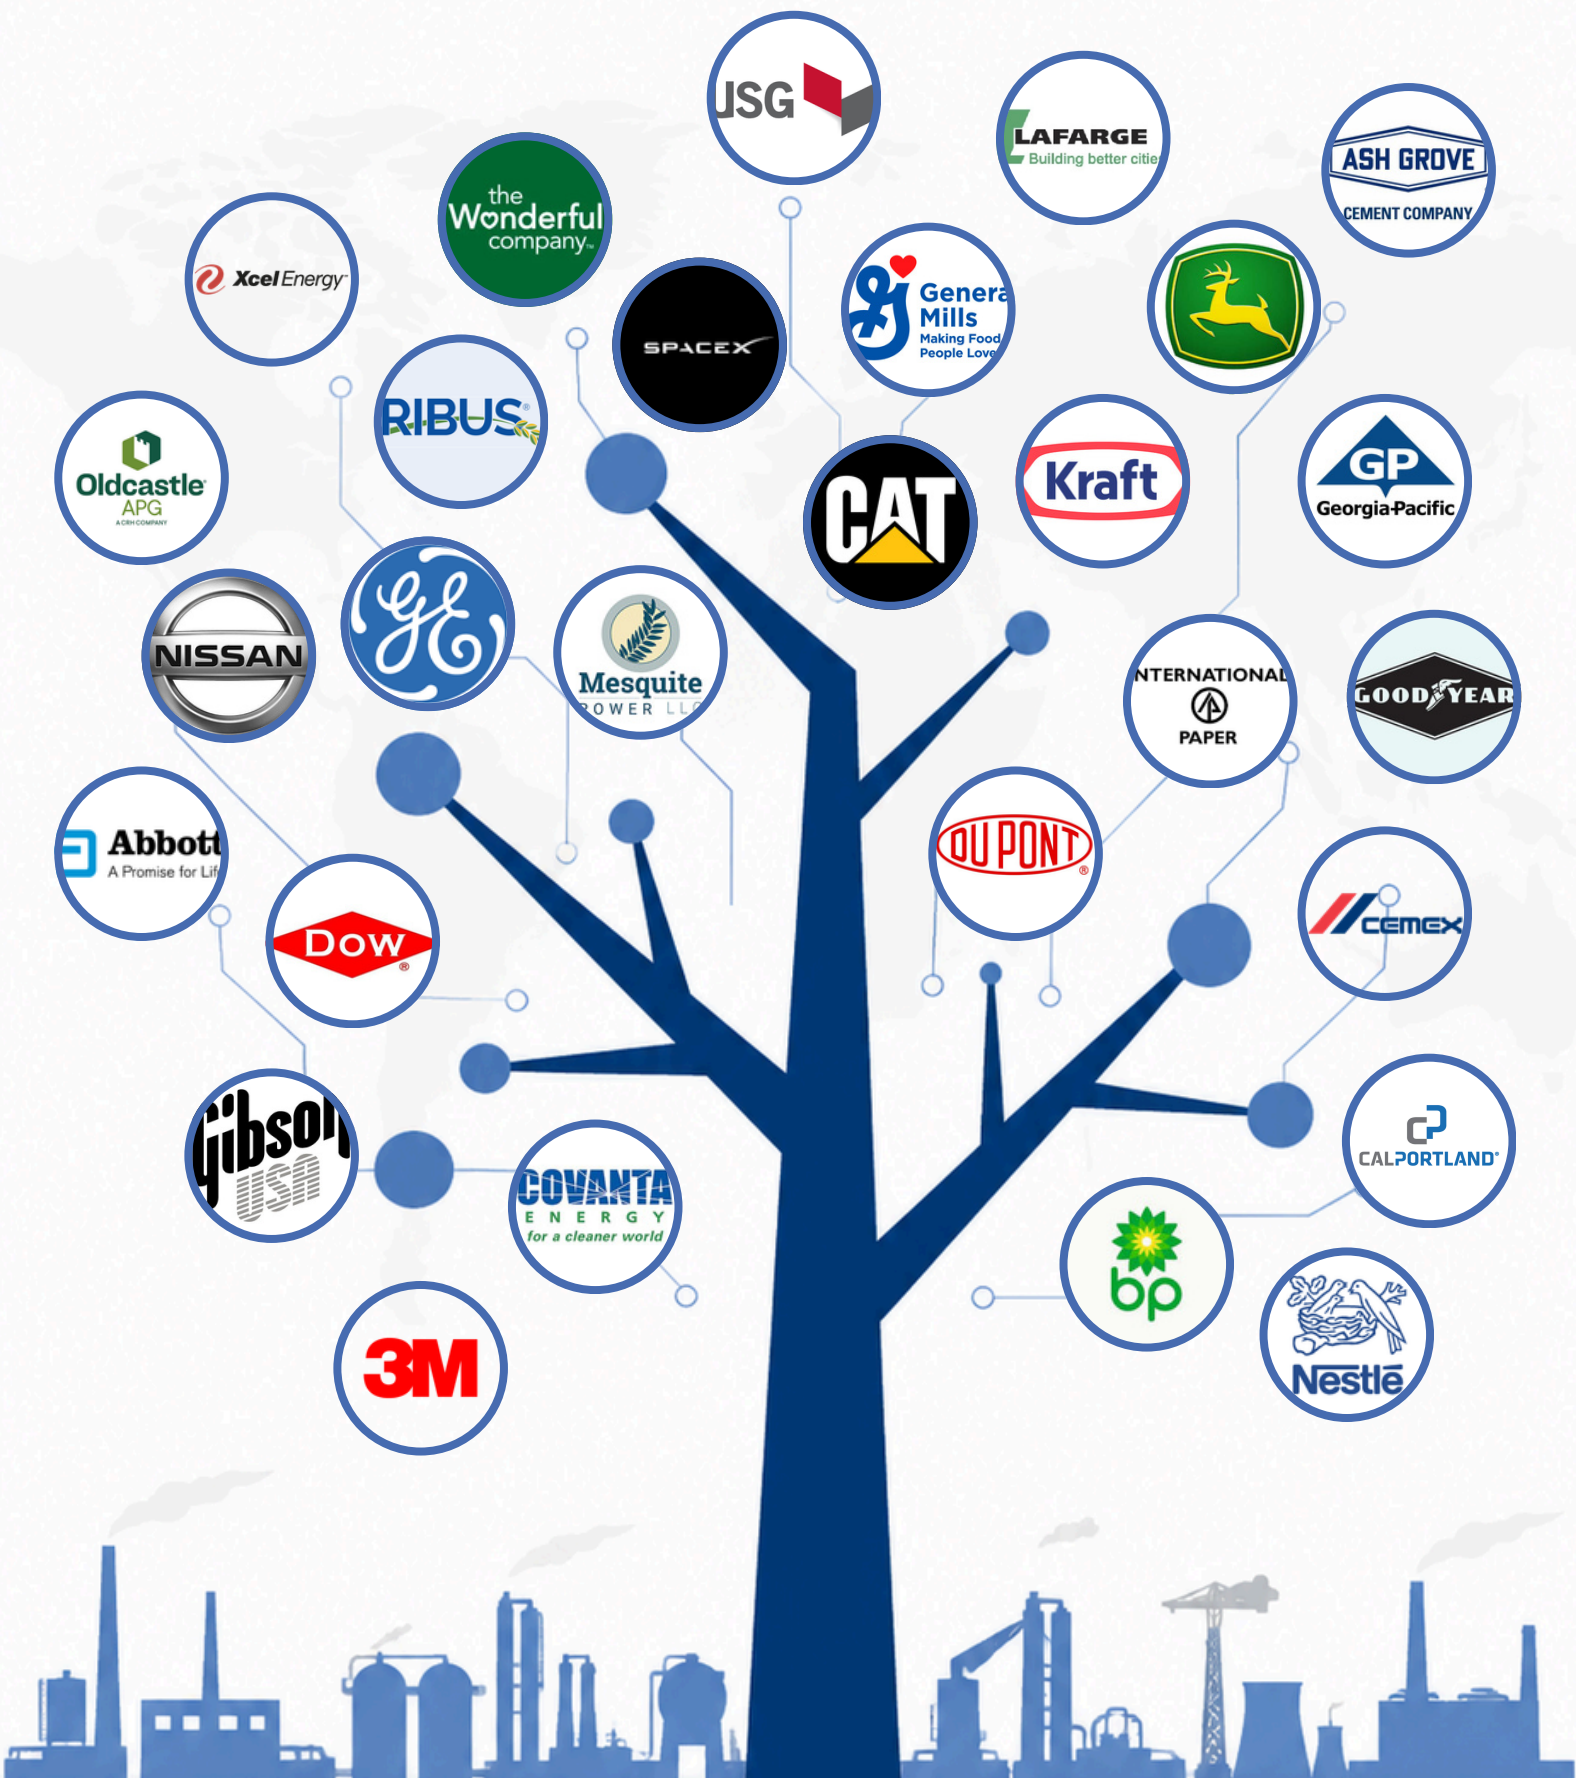

ABOUT US

Baghouse.com is a leading provider of industrial dust collection systems. Our reputation throughout the industry is largely due to an efficient system of processes designed to reduce cost and provide consistency to each project. We utilize modern business practices and management techniques to provide a wide range of baghouse products and services to the benefit of our customers.

**BAGHOUSE.COM HAS
ENGINEERED DUST COLLECTION
SYSTEMS FOR FOUR DECADES**

OUR CUSTOMERS

DUST COLLECTORS

Our dust collectors are known for their **high quality construction and reliability** as well as being easy to maintain. With over 40 years of experience manufacturing, servicing and optimizing industrial dust collectors, we have gained unique insight into what works and what does not.

PULSE JET BAGHOUSES

CARTRIDGE COLLECTORS

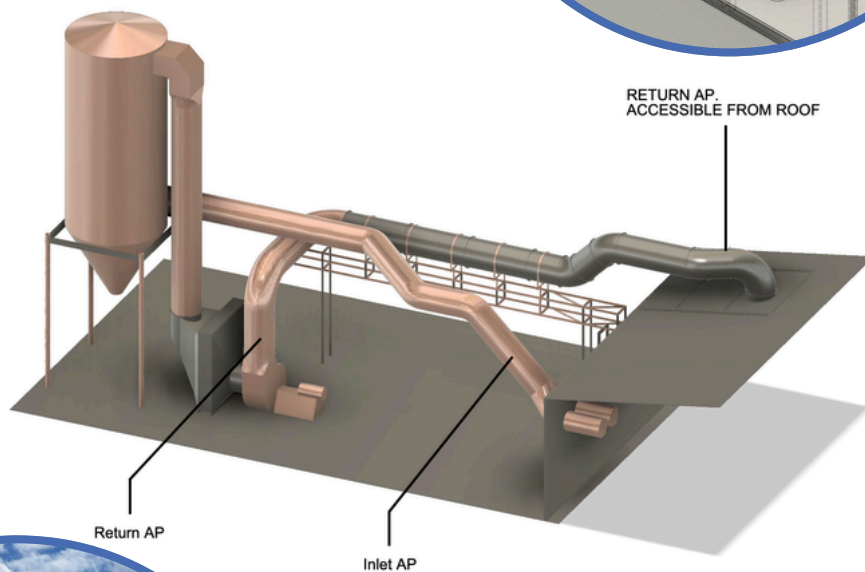

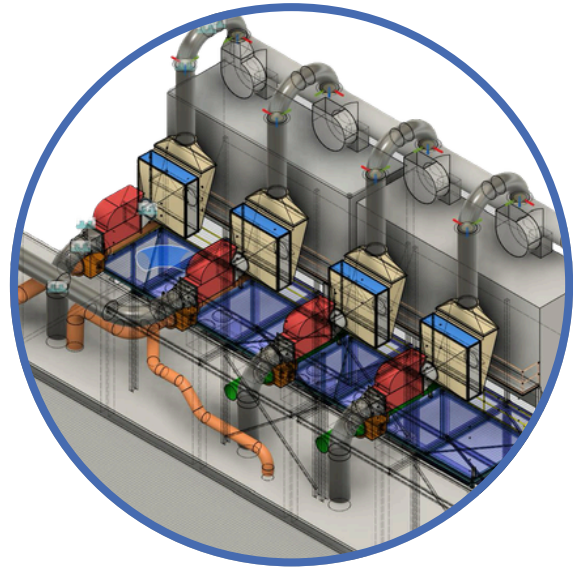

CYCLONE COLLECTORS

ENGINEERING & DESIGN

Our engineering team designs complete dust collection systems tailored to your process.

We develop detailed ductwork layouts using 3D modeling, perform airflow and pressure loss calculations, size fans and collectors, select the appropriate filter media, and engineer hoods, transitions, and discharge equipment to maximize collection efficiency.

We can then **fabricate and supply the entire package**—including ductwork, baghouses, fans, dampers, rotary airlocks, screw conveyors, controls, explosion protection, and related equipment—providing a fully integrated solution from design through installation.

INSTALLATION

Our experienced field crews install complete dust collection systems throughout North America, including ductwork, fans, hoods, rotary airlocks, screw conveyors, controls, explosion protection equipment, and supporting structural steel.

From setting equipment and assembling ductwork to electrical coordination, startup, and commissioning, **we ensure every component is installed according to engineering specifications and industry best practices.**

FILTERS & PARTS

At Baghouse.com, we evaluate your process, dust characteristics, operating temperatures, chemical exposure, and cleaning method to recommend the filter media that's best suited for your application. **We provide hundreds of thousands of replacement filter bags and cages each year, backed by competitive pricing, fast lead times, and reliable inventory.**

**Baghouse Filters and Cartridges
for Every Application and Industry**

**Replacement Cages to Fit
All Baghouse Makes and Models**

**Combustible Dust Accessories, Controls,
Valves, Remote Monitoring & Sensors,
Airlocks, Conveying Systems, and more.**

**EVERYTHING YOU
NEED TO KEEP YOUR
DUST COLLECTION
SYSTEM UP
AND RUNNING.**

SERVICES & CONSULTING

We offer a comprehensive range of services for your dust collection system. Including but not limited to: **baghouse filter replacement, maintenance programs, turn-key system installations, technical advisors, system audits, training courses, leak testing, and more.**
